Art Unit: 1631

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 20-22 and 24-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are vague and indefinite.

The claims embrace more than was elected. In the election filed February 11, 2003, applicants did not elect one combination for examination on the merits (see the Office action mailed October 2, 2002, pages 3-4). Applicants did elect SEQ ID NO: 1 and sequences encoding SEQ ID NO: 2, which have been examined on the merits. In the office action mailed March 24, 2003, claims directed to combinations of nucleotide sequences were treated on the merits, but ought not have been. The error is regretted. However, since applicants have received an action on the merits for those claims, those claims will continue to be examined on the merits. The combination claims (*i.e.* claims 20-22 and 24-26) claim in excess of 8 billion different combinations of two or more different nucleotide sequences selected from a total of 31 different nucleotide sequences. Since claims 20-22 and 24-26 are drawn to compositions reciting different combinations of individual nucleotide sequences, applicants are required to select one combination for examination. If the selected combination contains ten or fewer sequences, all of the sequences of the combination will be searched. If the selected combination contains more than ten sequences, the combination will be searched until one nucleotide sequence is found to be allowable. The order of searching will be chosen by the examiner to maximize the identification of an allowable sequence. If no individual nucleotide sequence is found to be allowable, the examiner will consider whether the combination of sequences taken as a whole renders the claims allowable. The identification of any allowable sequence(s) will cause all combinations containing the allowed sequence(s) to be allowed. See O.G. 68 (November 19, 1996) and MPEP 803.04.

Claims 27-31 are allowable over the prior art of record.
